EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims ~~51-58~~ have been canceled.[#]

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in claim(s) 20-44, wherein a method of manufacturing an optical member comprising forming a plurality of luminous flux conversion portions in the form of an array on a substrate; and forming an edge portion along a part of the circumference of each of said luminous flux conversion portions, and a handling/supporting portion which is provided on the side of the outer part of the circumference of each of said luminous flux conversion portion and is extended to connect and support, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

[#] Claims 51-58 have been withdrawn without traverse. See item number 5.

Examiner's Comments

3. Applicant's amendment filed 5/27/04 does not include claims 41-44. Applicant should provide a listing of claims 20-44, as they exist at the mailing of this action.

Election/Restrictions

4. Applicant's election without traverse of claims 20-44 in the reply filed on 5/27/04 is acknowledged.

5. Claims 51-58 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 5/27/04.

6. This application is in condition for allowance except for the presence of claims 51-58 to an invention non-elected without traverse. Accordingly, claims 51-58 have been cancelled.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following references are cited for being a related patent document by assignee or inventive entity: Sasaki (6717753) and Maeno (20040042739).

The following references are cited for disclosing a fiber mounting structure, but the references do not disclose a method of manufacturing an optical member comprising forming a plurality of luminous flux conversion portions in the form of an array on a substrate; and forming an edge portion along a part of the circumference of each of said luminous flux conversion portions, and a handling/supporting portion which is provided on the side of the outer part of the circumference of each of said luminous flux conversion portion and is extended to connect and
